

PERMANENT COLD ASPHALT

Let the combined resources from Fred Weber, Inc.'s®
Family of Companies handle all of your asphalt needs.

Distributed by

WATER-FILLED POTHOLES | PERMANENT REPAIR | UTILITY CUTS | OVERLAYS AND EDGE REPAIRS

EZ STREET® PRODUCES EZ STREET® COLD ASPHALT TO SOLVE YOUR PERSISTENT PROBLEMS WITH POTHOLES, UTILITY CUTS AND SMALL OVERLAYS.

Available in Bulk and Bags

EZ STREET® is currently used by DOTs across the U.S. in bulk and bag form. Not only does EZ STREET® work in all weather conditions, it even works in water. EZ STREET® is ready to use, easy to apply and is instantly ready for traffic. Simply sweep, fill and compact.

Produced with the highest quality aggregates combined with advanced polymer technology, EZ STREET® Cold Asphalt is specially formulated to improve cohesion, adhesion and water resistance. EZ STREET® Cold Asphalt is locally distributed by Fred Weber, Inc.®, which began operations in St. Louis in 1928. Today the Fred Weber family of companies employs approximately 1,400 employees. Our unique position located in the heart of St. Louis County allows us to offer the most competitive pricing without compromising excellent service.

Because EZ STREET® Cold Asphalt is distributed by Fred Weber, Inc.® locally, we are able to offer a one stop shopping approach with a wide range of products including rock, asphalt, concrete and other materials needed to maintain streets and roads.

You can save money because you reduce the costs of labor, machinery and maintenance, which are the most expensive aspects of patching. That savings goes straight to your bottom line.

“We have been using EZ STREET® since its inception in 2000 and although we have tried numerous other cold mix products since, nothing else has proven to be as good in both warm and cold weather conditions. Your product has been easy to get at any time and the price is very competitive.”
